Chennai, Tamilnadu, India

Technical Skills

Frontend

- Angular
- TypeScript
- JavaScript
- HTML5
- CSS3
- Bootstrap5

Backend

- ASP.NET / .NET Core
- Restful APIs
- Entity Framework
- Spring Boot

Database

- Microsoft SQL Server
- PostgreSQL

Tools

- Visual Studio
- VS Code

Languages

- English
- Tamil

Profile Summary

Full Stack Developer with around 3 years of experience designing, developing, and maintaining scalable web applications using Angular, .NET / .NET Core, Web APIs, SQL Server, and PostgreSQL. Experienced in building end-to-end solutions across front-end and back-end layers, including secure REST APIs, authentication and authorization, and database-driven business workflows. Strong background in Agile collaboration, unit testing, bug fixing, and deployment support to deliver stable and maintainable applications. Known for improving application usability, security, and performance through practical, project-based full stack development.

Work History

Trainee Software Developer | First Source Provider Services Pvt.Ltd (Formerly Quintessence Business Solutions & Services Pvt.Ltd)

DEC 2024 - MAY 2026

- Delivered enterprise web application features using Angular and .NET Core APIs to support end-to-end business workflows.
- Implemented secure REST APIs with authentication and authorization controls to protect role-based access and data handling.
- Integrated third-party APIs to automate workflow steps and reduce manual intervention across business processes.
- Collaborated with cross-functional teams in Agile sprints to plan, test, and release stable application updates.
- Optimized PostgreSQL and SQL Server queries to improve application responsiveness and reliability.

Internship - Full Stack Developer | First Source Provider Services Pvt.Ltd (Formerly Quintessence Business Solutions & Services Pvt.Ltd)

SEP 2024 - DEC 2024

- Built CRUD functionality for a demo web application using Angular, .NET, and SQL Server.
- Developed a proof-of-concept application to validate front-end and back-end integration for core business workflows.
- Created responsive UI screens and connected them to APIs to support create, update, and delete operations.

Software Engineer | FA Software Services Pvt. Ltd

MAY 2022 - SEP 2023

- Developed and maintained full-stack web applications using Angular and SQL Server, contributing to stable delivery of business features.
- Built modular UI components following Angular best practices to improve reusability, maintainability, and front-end performance.
- Partnered with QA and backend teams to resolve defects, support release readiness, and maintain production stability.
- Supported requirement analysis, unit testing, bug fixing, and deployment activities across the full development lifecycle.

Education

Agurchand Manmull Jain College | Bachelor of Science (Software Applications) | Chennai

2018 - 2021

HSC | John Dewey Matriculation Higher Secondary School | Villupuram

2018

SSLC | John Dewey Matriculation Higher Secondary School | Villupuram

2016

Certifications & Training

Full Stack Web Developer - Besant Technologies

Sep 2021 - Dec 2021

Generative AI - Internal Training Program | First Source (2025)

Data Science & Analytics - Internal Training Program | First Source (2025)

AI Ethics & Machine Learning - Internal Training Program | First Source (2025)

Key Projects

Credential Management System

OCT 2025 - DEC 2025

- Migrated legacy application to Angular (latest), .NET Core API (using Entity Framework & ADO.NET), and PostgreSQL.
- Implemented encrypted credential storage, role-based access (Employee, Client, Super Admin), and secure APIs.
- Enhanced UI/UX using Angular reusable components and responsive design principles.

Result: Improved system security, reduced unauthorized access risks, and enhanced user experience.

Healthcare API Integration – Availity

JULY 2025 - OCT 2025

- Integrated Availity Healthcare APIs to retrieve real-time insurance and claims data.
- Built backend services to securely store and manage API data in relational databases.
- Developed a user-friendly Angular interface for quick data access by AR teams.

Result: Reduced manual data entry errors and improved billing accuracy and turnaround time.

Reimbursement (Healthcare Reimbursement System)

DEC 2024 - JULY 2025

- Developed and delivered module - specific functionalities by utilizing .NET core APIs and SQL Server for back-end operations.
- Created stored procedure in MSSQL to manage validations and apply client-specific business rules, ensuring reliable and consistent data processing.
- Developed an Angular UI to handle claim mapping, user allocation, and workflow-related activities with a responsive and user-friendly interface.

Result: Improved claim processing efficiency, reduced validation errors, and ensured compliance with client-specific reimbursement rules.

LIC e-PGS Portal

MAY 2022 - SEP 2023

Modules: *Common, Superannuation, Gratuity* | **Sub-Modules:** *Customer, Quotation, Member Addition, Merger.*

- Developed multiple Angular components based on complex business workflows. Possess intermediate knowledge of Java and object-oriented programming concepts.
- Integrated LIC internal APIs and enhanced existing modules
- Conducted unit testing, defect fixing, documentation, and deployment support.
- Collaborated with QA and back-end teams to ensure high availability and system reliability.

Result: Delivered stable and scalable portal enhancements, improving user experience, system reliability, and overall policy management efficiency.
